| Title of Submission: | Workplace Substance Misuse Testing |
| Comments: | <p>I would like to suggest that workplace drug testing be carried out/implemented in An Garda Síochána and that this be implemented as a priority, if not already done so. As members of An Garda Síochána hold a critical position in society, it is my belief that there is a public interest in making sure that officers are fit for duty - both in an immediate sense and with respect to longer term integrity issues arising from drug use. A substance misuse testing facility can reduce the risk of corruption, amongst many other things, and again I believe that is is of paramount importance to sustain public confidence and integrity of the Garda organisation.</p> |
